

#### User:

- ☐ Has username and password
- ☐ If admin they can create new item descriptions and add new item instances
- ☐ If not they have a shopping cart and can add/remove items as well as checkout

#### Shopping Cart:

- ☐ A user is assigned a blank one on registration and after each checkout
- ☐ After checkout this becomes an audit trail that contains all previous transactions

#### Item:

- ☐ An instance of an item description, represents a single physical object that is was either sold or is currently in inventory
- ☐ Items are displayed as available when they are not in any cart
- ☐ Items are instances of item descriptions

#### Item Description:

- ☐ Contains the name, price, and category of an item as well as contains its picture.
- ☐ If the `is_deleted` flag is true then all items of this category are hidden from users (soft delete).
